SUMMARY

Beyond my role as a software engineer, I am dedicated to empowering youth to embrace their potential and become the best version of themselves. Let's unlock their greatness together!

SKILLS

Languages: JavaScript, Typescript, SQL, Python, HTML

Technologies: React, React Native, NextJs, ExpressJs, Sequelize, Mongoose, NodeJs

PROJECTS

Kubernetes,Docker NextJs,ExpressJs Mongoose,Redis

Ticket Vending App   github.com link

develops a scalable microservices app with Express.js, leveraging reusable code in custom NPM packages. Deployment uses Docker and Kubernetes for cloud scalability. Thorough testing ensures reliability, and code organization prioritizes modularity. Ongoing efforts enhance code reusability through refactoring and collaboration, fostering a robust microservices architecture

React,Typescript ExpressJs,Socket.io Redux,Sequilize

E-doctor app   github.com link

Working collaboratively with a team to create user interfaces for an online doctor appointment platform, allowing users to discover various doctors and schedule appointments. Implementing real-time availability tracking for different doctors and appointments using React to optimize the app and Redux for effective state management.

NextJs,Typescript Redux,ExpressJs Prisma

Tripma   github.com link

Contributing to the mission of crafting user interfaces and implementing features for a flight booking web app. Responsibilities include developing the payment process, integrating real-time server notifications, implementing responsive design for specific web pages, and managing the authentication process.

React-native, Socket.io,Sequilize EpressJs,Firebase

Medico App   github.com link

Designing web and mobile interfaces for purchasing medication products, focusing on enhancing the user experience. Responsible for creating an efficient order process, implementing missing product tracking, and ensuring secure payments using "Flouci". Additionally, I manage authentication for various roles, including role migration for improved security and access control.

EDUCATION

11/2020 - 03/2021 **Professional Certificate**   RBK RebootKamp,HACK REACTOR
Full Stack JavaScript Developer

12/2023 **Trainig Certificate**   Andrei Dumitrescu, Crystal Mind Academy
Python Programming: The Complete Python Bootcamp 2023

12/2022 **Training Certificate**   Udemy
User Interface Design Essentials - UI/UX Design

10/2013 - 7/2016 **Diploma**   University of Science Monastir
Diploma in chemistry

EXPERIENCE

07/2023 - Now **Cohort & Teck Lead**   ReBootKamp (RBK)
- To support students in an academically challenging environment and to be a source of advice and reassurance
- Teaching programming concepts, best practices, and the effective use of development tools and frameworks.
- Create IT content that fit the market need.
- Establishing the right tools and training to develop the student skills.

7/2022 - 7/2023 **Former full stack developer/Instructor**   ReBootKamp (RBK)
- Conducting training sessions: Delivering instructional materials and conducting training sessions or workshops.
- Continuously learning and exploring new techniques and trends in the field of full-stack development.
